*"As a result of the Killam Fellowships Program, I am a more confident, intellectually curious and open minded person. It is difficult for me to articulate the magnitude of the impact that this experience has had on me. My opinions of the U.S. and American society are vastly different then when I began the year, and I have also gained perspective on what it means to be Canadian, and how others perceive Canada."*

- Jessica Bosse, 2005-2006 Killam Fellow
